# BUILT FOR CONSTRUCTION BUILT FOR GROWTH

LEVESYS SOFTWARE IS BUILT WITH A LASER-SHARP FOCUS ON THE AUSTRALIAN CONSTRUCTION INDUSTRY. OUR MISSION IS SIMPLE: EMPOWER CONSTRUCTION AND SUB-CONTRACTOR BUSINESSES WITH THE RIGHT TOOLS TO GROW THEIR BUSINESS CONFIDENTLY.

## CONNECT FINANCE, FIELD SERVICE AND PROJECTS

Every successful business reaches a point where they outgrow the different software programs that got them there. Broken and manual processes inhibit growth. The next step is to move your construction business to a connected, fully integrated, single platform for financials, field service and projects. The result is accurate, real time, business-critical information that gives you the confidence to make decisions quickly and promotes strategic growth. With LEVESYS, you will achieve:

## IMPROVED FINANCIAL PERFORMANCE

Profitability in a competitive market like construction can be difficult to maintain and is sometimes sacrificed to secure contracts. By tracking all costs associated with projects electronically—from forecasting to cost estimations and by viewing actual and potential cost overruns—construction companies can be proactive with issues as they arise. Keeping focused on financial performance allows for cashflow-positive, profitable projects.

## INCREASED EFFICIENCY AND COMPLIANCE

Connected business processes allow for more efficient and faster processing of all business activity. Powerful workflow speeds up approval processes and allows for updating of business data in real time. Secure storage and electronic document tracking provide transparency, accountability and compliance across all projects.

## ENHANCED VISIBILITY AND REPORTING

Access accurate information where and when it's needed. Gain executive-level insights from dashboards with real-time financial and project data. Real-time visibility enables strategic planning and timely decision-making. Built-in mobility means data can be viewed and actioned in the office or on the job site without delays.

## WE GROW WITH YOU

As you grow, LEVESYS scales with you—from five users to 1000+. LEVESYS is powered by a flexible, scalable and modular web-based platform. By bringing all parts of your business together on a single electronic platform, you can deliver more profitable projects.

# WHY CHOOSE LEVESYS?

## FULLY INTEGRATED

Enhance your collaboration with a single, centralised and fully integrated web-based software solution. Our connected system covers the breadth of your financial, field service and project needs, with the built-in smarts to go deep, capturing every part of your business.

## AUTOMATED BUSINESS PROCESSES

LEVESYS automates essential business processes. You will achieve better productivity and operational efficiency, while eliminating duplication and errors.

## BUILT-IN WORKFLOW AND DOCUMENT CONTROL

In a successful project, transparency and accountability over business processes is essential. Built in workflow and document control provides tracking and revision management. Stay in control with varied user permissions and purchasing limits, as well as alerts and notifications about critical events.

## REAL-TIME DATA, ANALYTICS AND REPORTING

Enjoy effective and accurate decision-making with real-time access to business insights, data and analytics. Enhance stakeholder management with rapid access to accurate client and project information through dashboards, forecasting and reporting.

## MOBILITY AND FLEXIBILITY

You can access real-time data at any time, anywhere, in the office, on the road, or at the job site.

## MANAGE SECURITY AND RISK

Business growth forces owners to hand over the reins of day-to-day operations, which increases financial risk. LEVESYS gives you complete control with accurate and accessible data and reporting to help you manage risks.

## INDUSTRY COMPLIANCE

Built for the Australian construction industry, LEVESYS keeps your business lean by offering total compliance across security, industry and government standards.

## DEPLOYMENT CHOICE

LEVESYS is available on the cloud or on premise.
