FINANCIALS FOR CONSTRUCTION

TAKE CONTROL OF YOUR CONSTRUCTION BUSINESS

Managing financials for any business is a never-ending challenge.

And this is multiplied for construction companies because you deal with volatile market conditions, varying project duration and scope, and changing compliance and regulations.

You'll always know how you're tracking with LEVESYS— you will make better decisions with real-time data, automated business processes, and accurate reports and dashboards.

GROW WITH CONFIDENCE

We believe the only place for manual labour is on the job site.

Your finance department can do away with tedious manual processes, copy and paste, checking and re-checking, untimely and inaccurate data, and user frustration.

Accurate data is the foundation for stable growth. Simplify your business processes and generate an accurate snapshot of your business performance.

CONNECTED FINANCIALS

A good financials system integrates seamlessly and connects all parts of your business.

The LEVESYS system is built for Australian construction, so you can manage job costs from start to finish and streamline critical processes like accounting, purchasing, invoicing, payroll and general ledger.

Plus, it's simple enough to use consistently across the entire business.

IGNITE YOUR
BUSINESS
GROWTH WITH
FULLY INTEGRATED
CONSTRUCTION
FINANCIALS,
ACCOUNTING,
PAYROLL AND
TIMESHEETS.

CONSTRUCTION FINANCIALS MODULES
